Dear Mr. Rele,

Our company is always in search of viable solution to switch on to non-conventional energy sources. We have installed Bio gas plant and Solar water Heating System as a part of this initiative.

We are very pleased with the installation of Solar Street Lights and quality of service provided by your company. We are using your street lights for more than one year and are completely satisfied with the trouble free service.

We sincerely appreciate your responsiveness and the way you conduct business. We have recommended your company to others because of our satisfaction with your service.

Thanking You,

Yours faithfully,  
For Mahindra & Mahindra Ltd.
